

General Superfund Timeline

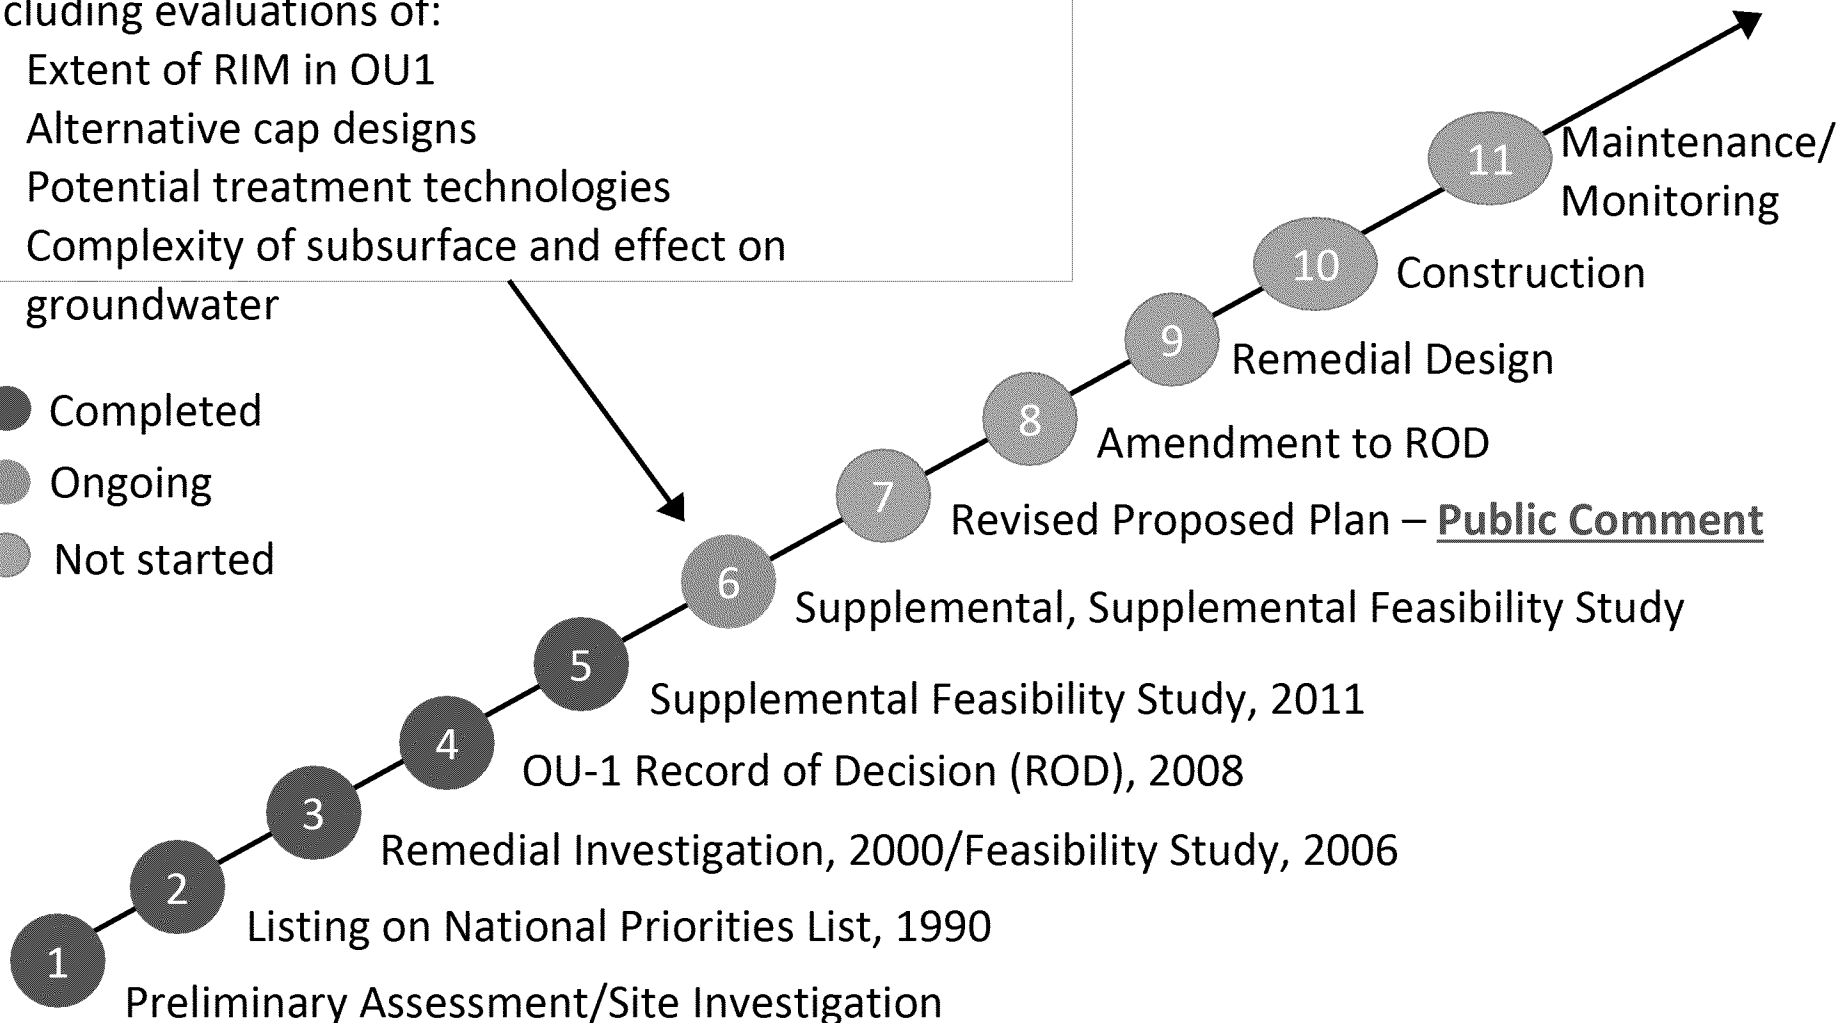

Including evaluations of:

- Extent of RIM in OU1
- Alternative cap designs
- Potential treatment technologies
- Complexity of subsurface and effect on groundwater

● Completed

● Ongoing

● Not started

Recent EPA Activities

- USGS groundwater report completed
 - TASC will summarize for next CAG meeting
- Bridgeton Landfill Thermal Isolation Barrier Investigation Phase 1 Report completed
- EPA off-site air monitoring results reported
 - VOCs and radiation measurements appeared normal for urban environment

Recent EPA Activities

- USGS groundwater report completed
 - TASC will summarize for next CAG meeting
- Bridgeton Landfill Thermal Isolation Barrier Investigation Phase 1 Report completed
- EPA off-site air monitoring results reported
 - VOCs and radiation detected at low levels consistent with background concentrations

EPA Plans

- RPs to test for RIM south and west of OU-1 Area 1 boundaries
 - RPs to develop sampling plan and work plans
- EPA to test RIM samples with high heat to simulate SSE
